

## SPECIFICATION

Range: **CUSI**  
Design: **Felicia Arvid**

Sound-absorbing element fixed to the wall

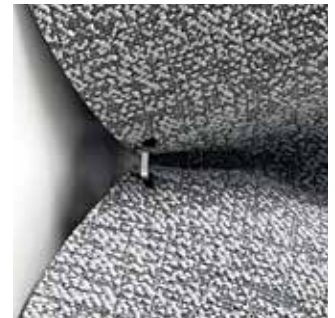

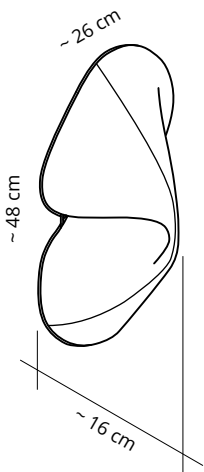

### Description:

Acoustic element made of 4 mm thick sound-absorbing laminated fabric, fitted with holes for the insertion of a shaped stainless steel plate. The plate holds the fabric in the central part and makes it a three-dimensional object with an organic and sinuous shape. The steel plate also allows the sound-absorbing element to be fixed to the wall by means of a magnetic attachment. The sound-absorbing fabric consists of a surface layer made of Snowsound-Fiber 8 Bouclé, coupled with a black polyester layer. The magnetic attachment consists of a non-magnetic spacer with a magnet perforated in the centre that allows direct attachment to the wall.

The product is **Greenguard Gold** certified, which validates its low VOC emission and its contribution to the quality of the indoor environment.

The panel is **100% recyclable** and has no detectable formaldehyde content according to UNI EN 717-2. It does not contain felts or other organic materials that are hardly recyclable.
