

SPECIFICATION

Range: **OVERSIZE**
Design: **Caimi Lab**

“Snowsound Technology” sound-absorbing element fixed to the wall.

Panel description:

Both faces with convex section 36 mm thick, consisting of an internal padding in variable density polyester fiber. The density decreases moving towards the heart of the panel, which is covered on both sides with Trevira CS® polyester fabric, solidly applied to the padding. The panel is double sided, with same characteristics on both sides. It is characterized by the rigid edge obtained by the manufacturing process itself, without any supporting and/or stiffening frame.

The panel has **Euroclass B-s2, d0** fire reaction.

The panel is **Greenguard Gold** certified, which validates its low VOC emission and its contribution to the quality of the indoor environment.

The panel is **100% recyclable** and has no detectable formaldehyde content according to UNI EN 717-2. It does not contain felts or other organic materials that are hardly recyclable.

The panel has been tested in reverberation chamber according to UNI EN ISO 354 and obtained “**Acoustic Absorption Class A**”, in accordance with UNI EN ISO 11654.

Panels dimensions: 119x119 cm
119x159 cm

All formats can be used both vertically and horizontally

Support description:

Wall support equipped with anti-release system, made of two zama elements: one plate that fixes directly to the panel with self-tapping screws and a support that fixes to the wall. These two parts are grafted into each other, firmly uniting, thanks to a threaded pin. Therefore the panel becomes immovable and only a thin profile on the upper edge remains visible, since the attachment remains hidden in the back.

2 pcs for panel with dimensions:

119 x 119
119 x 159
