

SPECIFICATION

Range: **SI SBOCCIA**
Design: **Moreno Ferrari**

“Snowsound Fiber Technology” sound-absorbing element fixed to the wall or suspended with cable.

Description:

“Snowsound Fiber 6 Velvet” sound absorbing fabric made entirely of polyester, spiral cut and rewound on itself to form a rose $\varnothing \sim 80$ cm.

The particular wave shape is obtained thanks to the insertion in the outer edge of the fabric of a steel cable $\varnothing 5$ mm and by means of a sartorial crease fixed in the centre on a circular flame-retardant wood core, also covered in fabric “Snowsound Fiber 6 Velvet”. In the central part, the wooden core has a hole that allows the passage of screws for direct fixing to the wall or for insertion of a pin. Here join respectively: a threaded cylindrical element $\varnothing 10$ mm which allows the precise height adjustment of the cable by means of a pressure system with safety lock; a steel cable $\varnothing 1.5$ mm and a conical plate in chromed steel $\varnothing 45$ mm with joint for rotating cable with two holes for screws (anchoring to the ceiling).

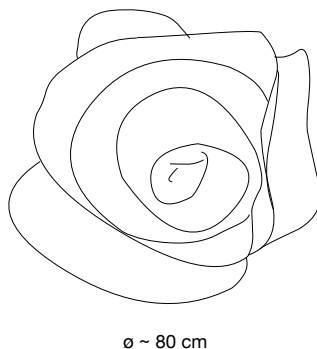

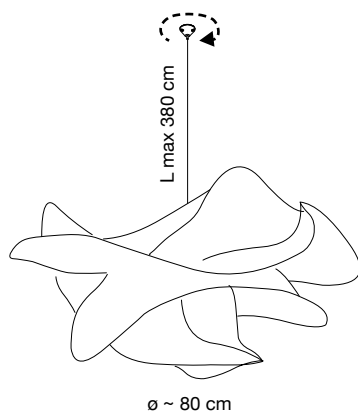

The fabric has a **Class1** fire reaction (Italian standard) and **Euroclass B-s1, d0**.

The fabric is **Greenguard Gold certified**, which certifies its low VOC emission and its contribution to the quality of the indoor environment.

The fabric is **100% recyclable** and has no detectable formaldehyde content according to UNI EN 717-2. It doesn't contain felt or other organic materials (hard to recycle).

Fabric Metration: 5 m²
